A list of changes has been attached below for reference:

	CPG No.	Change/Update
1	CPG 2.1	Adult medical cardiac arrest updated to reflect ERC 2025 changes
2	CPG 2.2	Adult trauma cardiac arrest updated to reflect ERC 2025 changes
3	CPG 2.3	Paediatric medical cardiac arrest updated to reflect ERC 2025 changes
4	CPG 2.4	Paediatric trauma cardiac arrest updated to reflect ERC 2025 changes
5	CPG 2.5	Resuscitation of the newborn & neonates updated to reflect ERC 2025 changes
6	CPG 2.6	Post cardiac arrest (ROSC) care updated to reflect ERC 2025 changes
7	CPG 2.8	Cardiac arrest in special circumstances updated to reflect ERC 2025 changes
8	CPG 3.1	Stroke CPG updated with new stroke window, transport decision tree and large vessel occlusion screening tool (RACE). All stuff must watch the following educational video to understand how to perform the RACE assessment appropriately - https://youtu.be/9-65gGKgx_k?si=fyOk2lX7LI0lJ4PY
9	CPG 4.3	Adult synchronised cardioversion joules updated for broad complex tachyarrhythmias
10	CPG 4.4	Adult synchronised cardioversion joules updated for narrow complex tachyarrhythmias
11	CPG 6.4	CCPs may sign off patients who have been administered an antiemetic. See CPG special notes for details
12	CPG 10.1	TXA added to paediatric section of algorithm for APs
13	CPG 10.2	TXA added to paediatric section of algorithm for APs and CCPs
14	CPG 10.3	Spinal Trauma CPG updated to provide further guidance on the management of neurogenic shock associated with spinal cord injuries and SMR principles
15	CPG 10.4	TXA added to paediatric section of algorithm for APs
16	CPG 10.5	TXA added to paediatric section of algorithm for APs
17	CPG 10.6	TXA added to paediatric section of algorithm for APs
18	CPG 10.7	TXA added to paediatric section of algorithm for APs
19	CPG 10.10	Trauma bypass criteria updated to include positive ‘seat belt sign’
20	CPG 10.11	TXA added to paediatric section of algorithm for APs
21	CPG 10.13	New CPG – Vehicle Extrication & Care of the Trapped Patient
22	CPG 12.1	TXA removed from Ectopic pregnancy algorithm
23	CPG 12.2	TXA removed from miscarriage algorithm

24	CPG 12.3	TXA removed from placenta abruption algorithm
25	CPG 12.4	TXA removed from placenta praevia algorithm
26	CPG 12.13	New CPG – Care of the Newborn
27	Formulary	TXA formulary updated to include administration to paediatrics by AP
28	Formulary	TXA indications updated to include paediatric isolated TBI with GCS ≤12 for AP and CCP
29	Formulary	TXA obstetric indications updated to post-partum haemorrhage only
30	Formulary	Ondansetron Formulary updated to reflect CCPs sign off to APs following administration

It is every clinician's responsibility to familiarise themselves with the latest changes and to remain up to date with the CPG.

Should you have any questions you may email HMCAS-Clinicalguidelines@hamad.qa

Kind Regards,

Dr. Loua Al Shaikh
Group Medical Director
